

The National Valve Museum

Updates May 2014

Thanks to Stig Comstedt and Peter bates for contributions this month.

Exhibits as of 30/04/14 = 3655 now 3717.

Minor bugs in the software have been fixed and data has been cleaned to remove a few inconsistencies and more cross references.

Expanded the Compactrons data in add116.htm and added 14 Compactron tubes to the site. This has also resulted in re-working the construction index process.

Added base B12C to the site. Used for the Compactrons.

Enhanced other valve base files and database links. Eg B12D.

Updated and enhanced the software linking makers in both adverts & boxes and exhibits.

Updated time-008.htm with diagrams of videcon structure and operation.

Added Adverts adv777 to adv797, Adverts 789 to 793 are from the Festival of Britain guide book.

Added Boxes box215 to box218

Added Telefunken Valve data from 1944.

Added two more trade publications to references.

Added more Wireless World issues to the museum references.

Added art-183 – Valve Cathode Life an article from December 1951.

Added time-068 – Ferranti hi-res CRT. From February 1964.

Finally when checking the new update on-line I was reminded of Lubarsky's Law of Cybernetic Entomology: There's always one more bug!
