

# The National Valve Museum

---

## Updates June 2014

This month I travelled to Washford to photograph some of Neil's collection. As well as valves I have added four boxes and two Catkin brochures (in the adverts section). If you get the chance the museum is well worth a visit.

Thanks to Rob Coleman for his contribution this month.

In updating the database processing software last month the cross references in the exhibits stopped working. They are now back again.

Exhibits as of 30/05/14 = 3717 now 3740.

Adverts added: 798 to 837

Four more boxes added.

Added to timeline with First radio microphone and start of Marconigraph synopsis 1912.

Added to timeline: M-OV golden jubilee and EEV low light TV camera tube.

Added extra PDF data-sheets including eight from Rob Coleman.
