

The National Valve Museum

Updates May 2016

This month is a limited update due to other pressures. However, it includes the start of an interesting collection – the Terry Collard Valve Collection. Exhibits will be added over the next months.

At the NVCF this month I found a Penton R Type and a Rubon DE2 both now listed.

Added 1 article:- art-212 Use of Thoria – patent information from 1912 and 1914.

Added 1 box:- Box277 Rubon Puratone from 1924.

Added 22 exhibits to take the total from 4508 to 4530.
