## Updates March 2017

This month all internal links have been checked and about a dozen corrections made.

An interesting set of new exhibits includes the Myers Dry Battery Triode and valves from TaKaDe TKD donated by Liam O'Hainnin of the Farvis Fernseh Museum. These latter exhibits have required the addition of the special base details. The Nuvistor Twelvar base has also been added.

I have been asked to supply some URL prefixes for direct access to the items mentioned on the news sheet. The global start of the URL for is:- <http://www.r-type.org/> then the secondary prefix to add to the root are:-

addtext/ for additional text items  
adverts/ for adverts  
articles/ for articles  
boxes/ for boxes  
refs/ for references  
timeline/ for timeline

In all cases after the file name add .htm.

Eg. The Myers box is located at <http://www.r-type.org/boxes/box299.htm>

The new and altered exhibits can be found from the main index on the home page.
