

# The National Valve Museum

---

## Updates November 2018

Robert Coleman has sent valves and data from JJ Electronic and Tube Amp Doctor. A fascinating extract from 'The Tube Amp Book' is reproduced as vox-020 and also referenced from the extras menu on the JJ Electronic ephemera page. The latter required a change to the software to allow the extras menu to be used in that section.

Gary Tempest pointed out that the introduction of Catkin valves was given as 1931 and not 1933. This has been changed and some extra clarity has been added.

Added 40 new exhibits taking the count from 5400 to 5439

Added 1 new maker  
Continental Electronic Co.

Added 1 article  
art-238 – Radiogramophonics – audio reproduction 1928 style – extra text added from December 1928 plus March and April 1929 publications.

Added 8 vintage adverts
