

The Valve Museum

Updates June 2020

Six new films added this month. The whole film section has been upgraded to the latest HTML and films moved from flash to mp4 format. The new software allows films to be embedded in articles etc.

Film-037 Wire Photo. 'Spot News' description of wire photo system.

Film-038 A Tour of Rod Burman's Collection.

Film-039 Vacuum Tubes. American war time training film.

Film-040 Electrons on Parade. Making RCA metal valves.

Film-041 Tektronix CRTs

Film-042 Making of a demonstration of a vintage CRT

Art-274. Amplifier experiments with 33A/158M double triode. Final update – nothing exciting.

Art-275. 6V6 Single end Ultra Linear experiments. Plus KT66 in same circuit.

Mike Burgess sent a parcel of original Mazda data sheets – now scanned to PDF.

Started updating equivalents with Types, basic descriptions and dates from Keith Throwers books.

Three new books added to the references section.

More exhibits and data from Joe Gruber added this month. Look for Moorhead, & General Electric. Also exhibits from The National Museum of Computing and Peter Bates. Thanks to all.

Trawl of data-sheets: added 160 data-sheets plus added some dates of introduction.
