

# The Valve Museum

---

## Updates July 2020

Replaced the dictionary in the editor with British English. Now working my way through the exhibit text to correct spellings.

Art-269 – the mini 6P14 amplifier – new version arrived from China.

Added details for the B14A diheptal base.

Added details of simple flash tube driving.

Continued updating equivalents with Types, basic descriptions and dates from Keith Throwers books.

More exhibits and data from Peter Bates, The National Museum of Computing and the start of a new collection from Chris Huggett. Thanks to all.

Trawl of data-sheets: added 91 data-sheets plus added some dates of introduction.
